

Broker Property Brief

Hypothetical dessert and beverage outlet | DLF Mall of India, Noida

FICTIONAL DEMO DOCUMENT. The public landmark address is real; all unit details, commercial terms, contacts, estimates, observations and proposed dates are fabricated for a Vesper product demonstration. This document is not issued by or affiliated with DLF.

Prepared for	Inventide / Vesper demo team
Prepared by	Rhea Malhotra, Senior Leasing Advisor (fictional)
Issue date	22 July 2026
Reference	NCA-NOI-260722-17
Property address	Plot No. M-03, Sector 18, Noida, Uttar Pradesh 201301, India
Proposed unit	Hypothetical 780 sq. ft. inline F&B unit, Level 2

Commercial snapshot supplied by broker

Item	Broker quotation / comment
Monthly base rent	INR 4.85 lakh plus applicable taxes
Common area maintenance	INR 95 per sq. ft. per month; utility charges extra
Security deposit	6 months of base rent, interest-free
Lease / lock-in	9-year lease; 36-month tenant lock-in
Escalation	15% after every 3 years
Revenue share	Not applicable according to broker
Fit-out period	45 days rent-free after physical handover
Proposed handover	15 September 2026, subject to previous tenant vacation

Broker observations

- The unit is positioned near a high-traffic fashion-to-food transition zone and is expected to benefit from weekend family visits and evening leisure traffic.
- Broker estimates total mall weekly footfall at 3.8-4.5 lakh during normal trading weeks. This estimate has not been supported with audited mall data.
- The immediate cluster already contains national coffee, ice-cream and quick-service brands; differentiation and speed of service will be important.
- The nearby Sector 18 commercial district and metro connectivity are expected to support weekday lunch and after-work demand.
- The broker believes a beverage-led format with desserts and limited hot preparation is the best fit for this unit.

Operational conditions and open points

Power	Broker states 60 kW sanctioned load can be made available; final electrical letter not supplied.
Food preparation	No open flame. Induction equipment may be allowed. Mechanical exhaust remains subject to mall engineering approval.
Deliveries	Preferred service-corridor access is 07:00-10:00. Emergency delivery outside the window requires prior security approval.
Signage	Internal fascia sign permitted subject to design approval; no independent exterior facade sign.
Waste handling	Wet waste must be sealed and moved through the service corridor at designated times.
Approvals missing	Final floor plan, fire NOC compatibility, exhaust approval, power letter and audited footfall data.

Broker recommendation

Proceed to commercial and technical due diligence. The location appears strategically attractive for a premium beverage and dessert format, but the occupancy cost is high and the unit should not be approved until the landlord confirms exhaust, power, delivery access, final handover date and the complete recurring-charge schedule in writing.
